

# Trouble in the street

A group of about ten young people meet up each evening outside the corner shop. They make a lot of noise and leave litter. The shopkeeper says they're keeping customers away who don't want to walk past them.

**How can this problem be solved?**

	★ One of the group.	★ The shopkeeper.	★ A shop customer.
★ What would you do if you were...			
★ What might happen next  to this person?			
★ What might happen to this person as a consequence of that?
